

1 - Roll out paper across the Headboard or Bulkhead.

2 - Cut small V-Slits on each side.

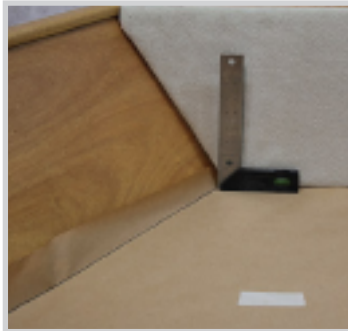

3 - Tape paper down. Be sure to keep edge of paper even with Headboard or Bulkhead.

4 - Crease paper with finger.

5 - Follow with Pen.

6 - In order to make the mattress follow the outward shape of the hull you need to measure the beveled or tapered edge.

7 - Place the square on the platform where bevel begins. Draw a line at the base of the square so we know which direction you measured.

8 - Measure the distance between the square and the hull. Based on the thickness of the mattress you have chosen. Example: If you chose the 6" Latex, go up 6" on the square and measure across to the hull.

9 - Be sure to measure both sides before the 2nd row of paper. This way you don't have to crawl on top of the pattern, and chance moving it around.

10 - Roll out 2nd layer of paper. Tape down to first layer, crease edges & follow with a pen.

11 - Roll out 3rd layer of paper. Tape down to 2nd.

12 - Crease edges into corner radius & finish with a pen.

13 - Be sure to mark hinge fold if you want a hinge. Also mark the head location & any other notes needed. If you have a difficult area to explain, attach photos.

Once pattern is complete, be sure to put your name and phone number on it and send it to your nearest location. Once we receive it, we will contact you with any questions & confirm pricing.

YOU CAN USE A CREDIT CARD OR PAY BY CHECK.

Mattress Info:

Name of Room	Size of Bed (dims)	Mattress Model	Thickness Patterned At	Hinge Fold (Yes or No)

Did you remember to:

- Mark the head and also the entrance of the mattress on the pattern?
- Make sure all seams on the pattern were taped.
- Mark where your storage is located, in case you have questions on hinge location?
- Do a drawing of the mattress either here or on the pattern to help us
